Reviews

This ebook is worth acquiring. Better then never, though i am quite late in start reading this one. You will not truly feel monotony at at any time of your own time (that's what catalogues are for about if you ask me).

Not illustrated. 1921 Excerpt: . . . of high land which forms the northern end of the Taconic range. On the west and northwest the spur is bounded by the valley of the Lemon Fair River, which is a southward extension of the Champlain lowland between the Taconic hills. On the east and northeast the spur is bounded by the low, swampy flood plain of Otter Creek, along which the Champlain lowland merges with the Vermont valley. The spur falls off gradually in altitude northward into the low schist ridge of Whiting, which is flanked on the east and west by limestone. There are certain structural features both within the spur and along its margins which will be described in detail beyond. General geological features. As one passes eastward from the lake region through the Taconic range towards the Green Mountains the confusion in field relations and the difficulty of interpretation increase. The field worker experiences the need of multiplicity of detail in critical relations in order to feel at all sure of his views of structure and even then it will happen that two persons will arrive at quite different conclusions with respect to the meaning of presumably critical relations or will stress quite different things as being of importance. It soon becomes apparent to the student of the metamorphosed and greatly deformed rocks lying east of the lake that the region must be viewed more or less as one grand unit in order to see into the meaning of its smallest...
