Skyhorse Publishing. Paperback. Book Condition: new. BRAND NEW, Anatomy of a Scientific Discovery: The Race to Find the Body's Own Morphine, Jeff Goldberg, In late 1973, scientists John Hughes and Hans Kosterlitz spent the majority of their time in an underfunded, obscure, and cramped laboratory in Aberdeen, Sweden. While working on the brains of pigs, the duo discovered a nonaddictive narcotic chemical. If they could isolate this chemical in humans, perhaps they could find a way to help the world heal itself. Hughes and Kosterlitz's research inevitably led them to discover endorphins, the body's own natural morphine and the chemical that makes it possible to feel both pain and pleasure. Announcing their findings to the scientific world thrust Hughes and Kosterlitz in the spotlight and made them celebrities. Soon, scientists all over the world were hastily examining the human brain and its endorphins. In a few years' time, they would use the team's initial research to link endorphins to drug addiction, runner's high, appetite control, sexual response, and mental illnesses such as depression and schizophrenia. In Anatomy of a Scientific Discovery, Jeff Goldberg describes Hughes and Kosterlitz's lives before, during, and after their historic and scientific breakthrough. He also takes a look at the bigger picture, revealing the brutal competition between drug companies to find a way to cash in on this monumental discovery.
