Jessica Kingsley Publishers. Paperback. Book Condition: new. BRAND NEW, Common laboratory tests used by TCM practitioners: When to Refer Patients for Lab Tests and How to Read and Interpret the Results, Partha Banerjee, Christina Captain, Traditional Chinese Medicine (TCM) practitioners need to have an understanding of Western medical testing to recognize when laboratory tests are required and to interpret test results that are brought to them by patients. This book is an essential reference for the TCM classroom and clinic that teaches how to use and understand conventional lab testing in the treatment and referral of patients. Focusing on symptoms that commonly present in TCM practices, the book groups the lab tests by diseases or systems. Within each chapter are TCM case studies and perspectives, as well as multiple choice quizzes that test the reader's knowledge. Co-written by a doctor of Western medicine and an acupuncture physician, the book aims to familiarize TCM practitioners with the terminology and methodology of lab tests, bridging the gap between Eastern and Western schools of medicine and promoting an integrative approach to improve the overall care of the patient.
