Not illustrated. 1914 Excerpt: . author administers by the mouth, in addition to carrying out other measures, 5 to 10 minims (0.3 to 0.6 c.c.) of a 1:1000 solution of epinephrin hydrochloride in a teaspoonful of water. The blood in the stomach is likely to have been the result of engorgement of the gastric vessels during the employment of the Trendelenburg position, the vessels subsequently rupturing under the stress of retching. In a series of cases, after washing out of the stomach contents with saline draughts, the passage of blood into the stomach was found to be arrested by the administration of epinephrin, and cessation of the vomiting promptly followed.--Keay (Edinburgh Medical Journal; Charlotte Medical Journal, October, 1913.) Radium in Leukemia Dr. Adolf Sachs, of Omaha, who is now in Vienna, sends us the following note in regard to the use of radium which may be of interest: Dr. Eppinger...
