

Diesel Retrofits: Quantifying and Using Their Emission Benefits in Sips and Conformity: Guidance for State and Local Air and Transportation Agencies

Filesize: 7.01 MB

Reviews

I actually started out looking at this publication. It normally is not going to cost too much. I am just happy to let you know that this is basically the finest publication i have got read through within my very own life and may be he very best publication for possibly.

DIESEL RETROFITS: QUANTIFYING AND USING THEIR EMISSION BENEFITS IN SIPS AND CONFORMITY: GUIDANCE FOR STATE AND LOCAL AIR AND TRANSPORTATION AGENCIES

DOWNLOAD

To get **Diesel Retrofits: Quantifying and Using Their Emission Benefits in Sips and Conformity: Guidance for State and Local Air and Transportation Agencies** PDF, you should access the web link listed below and download the ebook or get access to additional information which are highly relevant to **DIESEL RETROFITS: QUANTIFYING AND USING THEIR EMISSION BENEFITS IN SIPS AND CONFORMITY: GUIDANCE FOR STATE AND LOCAL AIR AND TRANSPORTATION AGENCIES** book.

Createspace, United States, 2015. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.Technology is available to reduce diesel vehicle and engine emissions in a cost-effective way. The ability to use diesel emission reductions for state implementation plan (SIP) and conformity purposes gives states and localities additional incentive to implement diesel retrofit projects. Diesel retrofit technologies reduce pollution from the existing diesel engine fleet by up to 90 for particulate matter (PM), up to 75 for nitrogen oxides (NOx), and up to 90 for volatile organic compounds (VOCs). Many diesel retrofit projects are being successfully implemented around the country. Clean diesel projects already initiated are expected to result in approximately 20,000 tons of particulate matter reduced over the life of the projects, with estimated public health benefits of about \$5 billion. The purpose of this document is to provide guidance on quantifying and using emission reductions from on-road and nonroad diesel vehicles, engines, and equipment that have been retrofitted with emission reduction technology. This guidance document describes how to quantify and use reductions of NOx, VOCs, PM2.5, PM10, and carbon monoxide (CO) in ozone, PM2.5, PM10, nitrogen dioxide (NO2), and CO nonattainment and maintenance areas. You can use the emission reductions resulting from implementing a retrofit project in a SIP to help achieve reasonable further progress (RFP), attainment of the national ambient air quality standard (NAAQS or standard), or maintenance of the NAAQS; and in transportation conformity and general conformity determinations. This guidance document is updated to reflect the new quantification procedures to use EPA s latest on-road emissions model, the MOtor Vehicle Emissions Simulator (MOVES) model. For nonroad emissions, the nonroad portion of the National MOBILE Inventory Model (NMIM) is the preferred way to estimate benefits of retrofit programs....
