

# Higher Electrical Engineering

By Shepherd, John, Morton, A.H., Spence, L.F.

Pearson Education Limited, United Kingdom, 1986. Paperback.  
Book Condition: New. 2nd Revised edition. 214 x 138 mm.  
Language: N/A. Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.  
This volume has been designed to cover the A1 and A2 stages of the Higher National Certificate in Electrical and Electronic Engineering. The contents correspond with much of the work in the Department of Education and Science outline syllabuses for HNC courses in England and Scotland and the text should also be useful for undergraduate CEI Part 1 and HND courses. This second edition has been updated to include recent developments in machinery and electronics. An introduction to the generalized theory of machines has been given and treatments of synchronous and induction machines have been substantially revised. A large number of worked examples have been included in the text. Problems with answers at the end of each chapter, some from previous examination papers, will give readers the opportunity to periodically test their understanding of the subject.

## Reviews

*Very beneficial to all of class of people. I am quite late in start reading this one, but better then never. You may like just how the writer create this publication.*

-- **Audra Klocko PhD**

*Thorough information! Its this type of great go through. It is amongst the most incredible publication i actually have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Germaine Welch**
