

## A First Course in Analytic Geometry, Plane and Solid; With Numerous Examples

Filesize: 3.4 MB

### ***Reviews***

*Most of these publication is the greatest publication offered. It is actually rally intriguing throgh reading period of time. You can expect to like just how the article writer create this publication.  
(Eddie Schuppe)*

## A FIRST COURSE IN ANALYTIC GEOMETRY, PLANE AND SOLID; WITH NUMEROUS EXAMPLES

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: .in 0, and take  $OA = OA = a$ . Then A and A are points on the curve. Why? Now between F and F take any point K. With F as center and AK as radius, describe arcs; with F as center and A K as radius, describe arcs intersecting the former in P and P . By interchanging radii, Q and Q are found. These all lie on the curve because the sum of the focal distances of each is  $2a$ . After finding enough points we join them by a smooth curve. (2) Mechanically. Fix pins at F and F and join them by a string of length  $2a$ . A pencil point P moved so as to keep the string stretched will trace the ellipse; for in all positions of P, we have  $PF + PF = 2a$ . i-l.  $yy - 1 a^2 62$  is the required equation. The normal is  $(y - Vi) = j (x - xi)$  The subtangent and subnormal are found by putting  $y = 0$  in equations of the tangent and normal; viz., subtangent  $= -x$ , b2 subnormal  $= -x$ , as Note.-That the subtangent is a function of the abscissa and  $a$ . 128. Equation of tangent in terms of slope.--The abscissas of the points of intersection of the line  $y = mx + o$  (1) with  $\$+i=i$  are determined by the equation  $a;2 (mx + cf 1, . + p 1 (3) 3$ . The tangent and normal to the ellipse at the end of...
