

## **Mathematical Bafflers**

By Angela Fox Dunn

Dover Publications Inc., United States, 1980. Paperback. Book Condition: New. Revised, Subsequent. 213 x 137 mm. Language: English . Brand New Book. Let the puzzlist beware: Mathematical Bafflers will disappoint those seeking the simple, straightforward, drudge-rewarding problem: it will delight those who have despaired of a truly challenging collection of mindteasers. Beginners are advised to look elsewhere the 158 conundrums offered here were designed by experts for experts and many experts were, simply, baffled. Mathematical Bafflers gathers the prime problems fromtwelve years of the esteemed weekly Problematical Recreations which appeared in Aviation Week and Electronic News periodicals read by mathematicians, engineers, computer programmers, and over the years, by serious puzzlists who heard about the special section. To keep the quality at a peak, Angela Dunn and a team of mathematicians invented their own puzzles and gleaned the best submissions from an enormous reader response. Criteria were conceptual originality, ingenuity of approach, elegance of solution, with preference given to the kind of puzzle more vulnerable to a flash of inspiration than mere persistence. Categories include algebra, geometry, diophantine equations, logic and deduction, probability, insight, and number theory. Each chapter provides solutions to all problems plus a selection of correspondence with readers...

## Reviews

This book is definitely worth acquiring. I have go through and so i am certain that i will likely to read through again again in the future. Its been printed in an exceptionally basic way in fact it is only after i finished reading this publication in which actually altered me, change the way in my opinion.
